Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology)

Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology)

Two of the most popular nutraceutical products on the market, omega-3 oil and glucosamine, were originally derived from waste products. Discarded oil from the manufacture of fishmeal became wildly popular as omega-3, a polyunsaturated fat, and the fully hydrolyzed chitosan from shrimp and crab shell, glucosamine, found wide use in joint health. Hundreds of tons of marine by-products are available annually and previous commercial success, together with an overall consumer interest in novel healthy food ingredients, are driving both research and commercialization in the area of marine nutraceuticals.

Edited by pioneers in the field, *Marine Nutraceuticals and Functional Foods* details information on a variety of commercially available and newly developing value-added products. Beginning with an overview of current marine nutraceuticals, the book discusses the origin of omega-3 oils, their beneficial effects on brain health, and their stabilization and delivery into functional foods. It covers the derivation and use of chitin, chitosan, and partially hydrolyzed chitosan as fat- and cholesterol absorbing agents and provides a detailed review of the health benefits and methods for the production of glucosamine. Providing an overview of the ACE-inhibitory and blood pressure reducing properties of marine proteins, it considers the functional constituents of marine algae and seaweed, including its carotenoids, and examines the cancer preventing potential of shark cartilage. The book also analyzes the use of marine microorganisms as a renewable resource and marine sources of calcium. The final chapter describes the discovery and development of a novel immunoenhancing polysaccharide complex derived from the microalgae, *Chlorella*.

An unparalleled single-source reference to the discovery, development, and use of value-added products from marine sources, *Marine Nutraceuticals and Functional Foods* provides the foundation for continuing the dramatic growth in this exciting field.

From reader reviews:

Nancy Deanda:

This Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) book is just not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this publication incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This specific Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) without we realize teach the one who reading through it become critical in contemplating and analyzing. Don't possibly be worry Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) can bring if you are and not make your case space or bookshelves' turn out to be full because you can have it in your lovely laptop even phone. This Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) having fine arrangement in word along with layout, so you will not sense uninterested in reading.

Charlsie Sprouse:

Beside this kind of Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you can got here is fresh from your oven so don't always be worry if you feel like an aged people live in narrow small town. It is good thing to have Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) because this book offers to you readable information. Do you oftentimes have book but you seldom get what it's about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book in addition to read it from right now!

Thomas Burke:

Within this era which is the greater man or woman or who has ability to do something more are more important than other. Do you want to become one among it? It is just simple solution to have that. What you are related is just spending your time not much but quite enough to enjoy a look at some books. One of several books in the top list in your reading list will be Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology). This book which is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upwards and review this publication you can get many advantages.

Charles Morris:

A lot of book has printed but it differs from the others. You can get it by world wide web on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by means of searching from it. It is known as of book Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology). You can include your knowledge by it. Without departing the printed book, it can add your

knowledge and make an individual happier to read. It is most critical that, you must aware about reserve. It can bring you from one location to other place.
