**Police Administration, 5th Edition** Gary W. Cordner, Kathryn E. Scarborough, Robert Sheehan

This text examines police administration from multiple perspectives: a systems perspective (emphasizing the interrelatedness among units and organizations); a traditional, structural perspective (administrative principles, management functions, and the importance of written guidelines); a human behavioral perspective (the human element in organizations); and a strategic management perspective (communications and information systems, performance evaluation, strategies and tactics, and prevailing and promising approaches to increasing effectiveness of police agencies).

Coverage of management functions and organizational principles is streamlined while providing a stronger emphasis on diversity principles and on developing police agencies as learning organizations. A concluding chapter covers contemporary issues, including community engagement, collaboration, globalization, racial profiling, mass media, cyber crime, terrorism and homeland security.

- Chapters enhanced with learning objectives, discussion questions, and boxes including information such as the Standards for Law Enforcement Agencies.
- Case studies with discussion questions provide opportunities for the reader to review real-world situations.
