New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) H. Fujita, M. Mejri

Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This book is an attempt to capture the essence of a new state of art in software science and its supporting technology. The book also aims at identifying the challenges such a technology has to master. One example that is challenged is Lyee methodology as a new Japanese emerged software methodology that has been patented in several countries in Europe, Asia, and America. But it is still in its early stage of emerging as a new software style. This series will also contribute to elaborate on such new trends and related academic research studies and development.

IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields.

Some of the areas we publish in:

- Biomedicine
- Oncology
- Artificial intelligence
- Databases and information systems
- Maritime engineering
- Nanotechnology
- Geoengineering
- All aspects of physics
- E-governance
- E-commerce
- The knowledge economy
- Urban studies
- Arms control
- Understanding and responding to terrorism
- Medical informatics
- Computer Sciences

From reader reviews:

Bernard Lewis:

Do you one among people who can't read pleasant if the sentence chained from the straightway, hold on guys that aren't like that. This New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) book is readable by you who hate the perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to offer to you. The writer of New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) content conveys objective easily to understand by most people. The printed and e-book are not different in the written content but it just different available as it. So , do you continue to thinking New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) is not loveable to be your top record reading book?

Clarence Cobb:

Exactly why? Because this New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) is an unordinary book that the inside of the book waiting for you to snap it but latter it will zap you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such wonderful way makes the content within easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of gains than the other book possess such as help improving your talent and your critical thinking approach. So , still want to hold off having that book? If I were you I will go to the publication store hurriedly.

Darrell Mayo:

New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) can be one of your beginner books that are good idea. Many of us recommend that straight away because this book has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The article author giving his/her effort to place every word into joy arrangement in writing New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) although doesn't forget the main place, giving the reader the hottest and based confirm resource information that maybe you can be considered one of it. This great information can certainly drawn you into completely new stage of crucial imagining.

Joan Beverly:

Is it anyone who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something new? This New Trends in Software Methodologies, Tools and Techniques (Frontiers in Artificial Intelligence and Applications) can be the reply, oh how comes? A

book you know. You are so out of date, spending your free time by reading in this new era is common not a geek activity. So what these ebooks have than the others?
