## **SOCIETY: Progress and Force: Criteria and First Principles** Alex Battler

The present book, being a sequel to *Dialectics of Force: Ontobia*, is dedicated to the topics of progress and force of society – topics that may appear trivial at first sight, for a mountain of literature has been written on them. The author, however, having conscientiously presented the views on progress and force of all prominent thinkers over the past and the present, chose to follow a distinct path and formulated the criteria of progress based on entirely different scientific paradigms. Moreover, he dared to formulate the two Principles of Social Development, which are akin in their fundamental nature to the first and second laws of thermodynamics. The result is a book that is very complex in content. Nonetheless, the style of presentation used throughout most of the work makes it accessible even to those who have never read Hegel. This book is intended for instructors and students of philosophy and social sciences, and also for all those who are interested in problems of man and mankind.
