It covers the overall critical areas of management from selling to systems, from boards to human resources. Many chapters compare and contrast how smaller private firms and larger public companies deal with the same issues, using real life stories to help the reader relate. The book ends with the all-encompassing topic of leadership and culture, which either grow or destroy individuals and their organizations in a dog-eat-dog way. Along the way, various animals or creatures like wizards are used to help explain things. So take a read and maybe learn something about business and life through The Business Zoo!
