Clean and Efficient Use of Coal: The New Era for Low-Rank Coal : Conference Proceedings : Budapest, Hungary, February 1992 International Energy Agency

With rapidly changing economic and political climates, the countries of Eastern and Central Europe are searching for answers to decades of inefficient coal production and use and environmental neglect. A central question is how new clean coal technologies can help in addressing these problems. These proceedings contain the perspectives of senior executives from governments, the coal industry, electric utilities, R&D centers, and regulators. Major topics include "best practice" technology applicable to the indigenous coal of central and eastern Europe and East-West cooperation on technology management and development in the transition towards market economies. The conference also discussed options for financial and technical assistance to retrofit and repower coal-fired power plants and related infrastructure.
