Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) Alexander V Avakov

Members of the US Congress and others who care about the foundations of power politics in the nuclear age will find facts that speak for themselves in this novel yearbook. This statistical annual presents fundamental data in four sections: (1) Quality of Life, (2) Balance of Power, (3) Developed Market Economies since 1960, and (4) Economic History since 1500. It contains data that is generally not available elsewhere. Sections 1 and 2 give statistics for 230 countries. The World Bank and Encyclopedia Britannica provide statistical data for a maximum of about 160 countries. The actual number of countries in World Bank statistical tables is even smaller. The CIA World Factbook gives data for about 230 countries but that data is limited in scope and is imprecise. Other statistical publications are even less satisfactory. The author has managed to increase the number of countries tallied by writing proprietary software utilizing statistical regressions, selecting data which, first of all, is important and, second, which allows for high correlation coefficients for these regressions. Section 2 includes data about nuclear delivery systems and the number of nuclear warheads of all nuclear powers. This is based on information from reputable sources. Among others, it includes estimates of the Israeli nuclear arsenal which usually do not appear in the press. Official estimates of Russian military expenditures distributed by US and British intelligence communities are methodologically flawed. Such estimates claim to give a picture of military expenditures of the countries of the world at market exchange rates; at the same time, they apparently cite Russian military expense figures at purchasing power parities, thus inflating these numbers in comparison to those of other countries. Such deceptive practices of the Anglo-American intelligence services are counter-balanced by presenting two different tables, showing military expenditures estimates both at market exchange rates and by purchasing power parities. Section 3 gives data on the topic of health care. It seems that public health expenditures as a share of total health expenditures has a stronger correlation with the comparative level (and the rates of improvement) of the main health care indicators than the absolute level (measured as a percent of GDP) of total health expenditures. The data demonstrates that the US has the lowest public health expenditure of developed market economies and is increasingly lagging behind other countries by main health care indicators. The proposed introduction of national health insurance in the US would probably mean some sort of tax increase. The author therefore also seeks to shed light on modern ideological debates about the share of taxation in GDP and its influence on rates of growth. Surprisingly enough, the empirical data for the developed market economies do not seem to support the popular idea that low taxes are strongly correlated with higher rates of growth; depending on how the data are analyzed, the appropriate correlations are either low or even the reverse of what is commonly believed. Section 4 primarily uses data which has become available through the groundbreaking works of Angus Maddison. Using interpolation techniques explained in that section to slightly adjust Maddison's data, the author received numbers for population, GDP per capita, and total GDP for 48 countries for the period since year 1500, figures which seem to be credible and which are not readily available elsewhere.

From reader reviews:

Phillip Permenter:

What do you think of book? It is just for students since they're still students or that for all people in the world, what the best subject for that? Only you can be answered for that issue above. Every person has distinct personality and hobby for each and every other. Don't to be pressured someone or something that they don't would like do that. You must know how great along with important the book Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6). All type of book would you see on many resources. You can look for the internet sources or other social media.

Harry Dwyer:

Now a day folks who Living in the era where everything reachable by match the internet and the resources within it can be true or not need people to be aware of each details they get. How a lot more to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Examining a book can help folks out of this uncertainty Information specially this Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) book because this book offers you rich information and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you know.

John Sherman:

Many people spending their time period by playing outside along with friends, fun activity along with family or just watching TV the entire day. You can have new activity to shell out your whole day by studying a book. Ugh, you think reading a book can actually hard because you have to accept the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Smartphone. Like Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) which is having the e-book version. So , why not try out this book? Let's see.

Tara Cassell:

As a pupil exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's soul or real their passion. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) can make you really feel more interested to read.
