Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks)

Guy Pujolle

Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) Guy Pujolle

The goal of this book is to describe new concepts for Internet next generation. This architecture is based on virtual networking using Cloud and datacenters facilities. Main problems concern 1) the placement of virtual resources for opening a new network on the fly, and 2) the urbanisation of virtual resource implemented on physical network equipment. This architecture deals with mechanisms capable of controlling automatically the placement of all virtual resources within the physical network.

In this book, we describe how to create and delete virtual networks on the fly. Indeed, the system is able to create any new network with any kind of resource (e.g., virtual switch, virtual routers, virtual LSRs, virtual optical path, virtual firewall, virtual SIP-based servers, virtual devices, virtual servers, virtual access points, and so on). We will show how this architecture is compatible with new advances in SDN (Software Defined Networking), new high-speed transport protocol like TRILL (Transparent Interconnection of Lots of Links) and LISP (Locator/Identifier Separation Protocol), NGN, IMS, Wi-Fi new generation, and 4G/5G networks. Finally, we introduce the Cloud of security and the virtualisation of secure elements (smartcard) that should definitely transform how to secure the Internet.

From reader reviews:

Ray Chung:

Book is to be different for every single grade. Book for children until adult are different content. As it is known to us that book is very important for people. The book Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) was making you to know about other expertise and of course you can take more information. It is rather advantages for you. The publication Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) is not only giving you considerably more new information but also being your friend when you really feel bored. You can spend your own spend time to read your publication. Try to make relationship with all the book Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks). You never feel lose out for everything in case you read some books.

Gregory Sowers:

People live in this new morning of lifestyle always make an effort to and must have the time or they will get lot of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely yes. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, typically the book you have read will be Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks).

Ronda Powers:

This Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) is great book for you because the content which can be full of information for you who all always deal with world and possess to make decision every minute. This book reveal it information accurately using great arrange word or we can declare no rambling sentences inside. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tough core information with lovely delivering sentences. Having Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) in your hand like finding the world in your arm, information in it is not ridiculous one particular. We can say that no guide that offer you world in ten or fifteen small right but this reserve already do that. So , this really is good reading book. Hello Mr. and Mrs. active do you still doubt this?

Allen Green:

A lot of people said that they feel fed up when they reading a e-book. They are directly felt it when they get a half parts of the book. You can choose the book Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) to make your own personal reading is interesting.

Your personal skill of reading proficiency is developing when you similar to reading. Try to choose straightforward book to make you enjoy to see it and mingle the sensation about book and reading especially. It is to be first opinion for you to like to open a book and go through it. Beside that the e-book Software Networks: Virtualization, SDN, 5G, Security (Networks & Telecommunication: Advanced Networks) can to be your brand new friend when you're really feel alone and confuse using what must you're doing of that time.
