Andrew Dicks, Andrei Hent

Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) Andrew Dicks, Andrei Hent

This contribution to SpringerBriefs in Green Chemistry outlines and discusses the four major green chemistry metrics (atom economy, reaction mass efficiency, E factor and process mass intensity), at a level that is comprehensible by upper-level undergraduates. Such students have previously received fundamental training in organic chemistry basics, and are ideally positioned to learn about green chemistry principles, of which metrics is one foundational pillar. Following this, other green metrics in common use are discussed, along with applications that allow important calculations to be easily undertaken. Finally, an introduction to metrics in the context of life cycle analyses is presented. It should be noted that no other available publication teaches green chemistry metrics in detail with an emphasis on educating undergraduates, whilst simultaneously providing a contemporary industrial flavour to the material.

From reader reviews:

Terrance Allen:

What do you concerning book? It is not important along with you? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question because just their can do which. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this particular Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) to read.

Arielle Griffin:

As people who live in the modest era should be up-date about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and move ahead. Some of you maybe will certainly update themselves by reading through books. It is a good choice for yourself but the problems coming to you actually is you don't know what type you should start with. This Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

Janice Arias:

Is it you who having spare time after that spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) can be the answer, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?

Doris Garcia:

Do you like reading a book? Confuse to looking for your chosen book? Or your book seemed to be rare? Why so many concern for the book? But almost any people feel that they enjoy to get reading. Some people likes reading through, not only science book but also novel and Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) or perhaps others sources were given understanding for you. After you know how the great a book, you feel want to read more and more. Science e-book was created for teacher or students especially. Those publications are helping them to add their knowledge. In various other case, beside science book, any other book likes Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness (SpringerBriefs in Molecular Science) to make your spare time much more colorful. Many types of book like this.
