Vertebrate Dissection Dominique G. Homberger, Warren F. Walker

VERTEBRATE DISSECTION, Ninth Edition, provides exceptionally thorough and student-tested descriptions of dissection procedures and the steps needed to find all structures. It encourages and facilitates active and self-directed learning by the students so that instructors can teach more effectively and efficiently. The manual emphasizes dissection procedures that preserve as many structures as possible for later review of the entire specimens. This approach is an excellent preparation for students who will subsequently take anatomy courses in the health and animal sciences. Moreover, this manual places the observed material into an evolutionary and functional context. Students will understand the biological role, physiology, and embryonic development of each organ system and its parts, and how the various organ systems have evolved over time and in different animals. Organized by organ systems, this text brings the anatomy alive for students by interspersing narrative text throughout and explaining how the shape and structure of an organ relates to its function, and how evolutionary processes have transformed the form and function of organs. Additionally, the authors introduce a new feature, Anatomy in Action boxes, which contain interesting supplemental material that provides a broader context. Some of these boxes relate to functional anatomy, some make comparisons between different animals, and some address general biological questions that may include comparisons to the anatomy and biology of human beings.

From reader reviews:

Marcia Fullerton:

Book is written, printed, or descriptive for everything. You can understand everything you want by a e-book. Book has a different type. We all know that that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A guide Vertebrate Dissection will make you to end up being smarter. You can feel much more confidence if you can know about everything. But some of you think that open or reading the book make you bored. It is not make you fun. Why they may be thought like that? Have you searching for best book or ideal book with you?

Evelyn Looney:

What do you in relation to book? It is not important along? Or just adding material if you want something to explain what you problem? How about your free time? Or are you busy person? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have time? What did you do? All people has many questions above. They have to answer that question due to the fact just their can do in which. It said that about reserve. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this kind of Vertebrate Dissection to read.

James Cooper:

That guide can make you to feel relax. This specific book Vertebrate Dissection was bright colored and of course has pictures on there. As we know that book Vertebrate Dissection has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that.

Laura Buscher:

What is your hobby? Have you heard which question when you got scholars? We believe that that problem was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you also know that little person just like reading or as looking at become their hobby. You should know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You find good news or update about something by book. Amount types of books that can you choose to adopt be your object. One of them are these claims Vertebrate Dissection.
