Faith and Health: A Framework for Christian Nurses Lynda W. Miller

This book is a response to a need. Christian nurses, in a wide range of settings, perform their work based on beliefs drawn from their faith, but until now they've had no specifically Christian theoretical foundation to help them. Nurses working in the emerging field of "Parish Nursing" in particular need a framework that helps them explicitly link the tenets of faith and concepts of health in their practice, education, and research. Nurses of other faiths may also find the framework useful in seeing a way to relate their own beliefs and values to their nursing.

In the book's **Introduction** the author tells why she devoted her doctoral research to theory development and how she went about doing that. The body of the book describes her nursing conceptual framework in depth, yet in an informal "reader friendly" style. The concluding chapter answers the question "**Now what?**" and helps readers make practical applications in their everyday lives.

The four major components of the **Faith and Health Framework** are presented in detail:

Person/Parishioner, Health/Shalom-Wholeness, Nurse/Parish Nurse, and Community/Parish, with the integrating component **The Triune God**. Described under each component are two organizing concepts, which in turn contain other key concepts, such as: *mission, ministry, compassion, competence and communion*. Various perspectives on the Framework are depicted in several full-color stained glass figures and in an inspirational poem written by the author. There are extensive bibliographic references and quotations from *The Holy Bible*, throughout, plus **Appendices** of relevant materials and resources.
