# Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing)

*Pierre Duhamel, Michel Kieffer*

**Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing)** Pierre Duhamel, Michel Kieffer

- Treats joint source and channel decoding in an integrated way
- Gives a clear description of the problems in the field together with the mathematical tools for their solution
- Contains many detailed examples useful for practical applications of the theory to video broadcasting over mobile and wireless networks

Traditionally, cross-layer and joint source-channel coding were seen as incompatible with classically structured networks but recent advances in theory changed this situation. Joint source-channel decoding is now seen as a viable alternative to separate decoding of source and channel codes, if the protocol layers are taken into account. A joint source/protocol/channel approach is thus addressed in this book: all levels of the protocol stack are considered, showing how the information in each layer influences the others.

This book provides the tools to show how cross-layer and joint source-channel coding and decoding are now compatible with present-day mobile and wireless networks, with a particular application to the key area of video transmission to mobiles. Typical applications are broadcasting, or point-to-point delivery of multimedia contents, which are very timely in the context of the current development of mobile services such as audio (MPEG4 AAC) or video (H263, H264) transmission using recent wireless transmission standards (DVH-H, DVB-SH, WiMAX, LTE).

This cross-disciplinary book is ideal for graduate students, researchers, and more generally professionals working either in signal processing for communications or in networking applications, interested in reliable multimedia transmission. This book is also of interest to people involved in cross-layer optimization of mobile networks. Its content may provide them with other points of view on their optimization problem, enlarging the set of tools which they could use.

**Pierre Duhamel** is director of research at CNRS/ LSS and has previously held research positions at Thomson-CSF, CNET, and ENST, where he was head of the Signal and Image Processing Department. He has served as chairman of the DSP committee and associate Editor of the IEEE Transactions on Signal Processing and Signal Processing Letters, as well as acting as a co-chair at MMSP and ICASSP conferences. He was awarded the Grand Prix France Telecom by the French Science Academy in 2000. He is co-author of more than 80 papers in international journals, 250 conference proceedings, and 28 patents.

Michel Kieffer is an assistant professor in signal processing for communications at the Université Paris-Sud and a researcher at the Laboratoire des Signaux et Systèmes, Gif-sur-Yvette, France. His research interests are in joint source-channel coding and decoding techniques for the reliable transmission of multimedia contents. He serves as associate editor of Signal Processing (Elsevier). He is co-author of more than 90 contributions to journals, conference proceedings, and book chapters.

**From reader reviews:**

**Stanley Kamp:**

Have you spare time to get a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a move, shopping, or went to the particular Mall. How about open or read a book allowed Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing)? Maybe it is being best activity for you. You know beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with its opinion or you have different opinion?

**Jason Villalobos:**

Do you one among people who can't read pleasurable if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) book is readable through you who hate the perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to deliver to you. The writer associated with Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different as it. So , do you nonetheless thinking Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) is not loveable to be your top collection reading book?

**Mary Mohammad:**

Do you have something that you like such as book? The book lovers usually prefer to pick book like comic, brief story and the biggest some may be novel. Now, why not trying Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) that give your entertainment preference will be satisfied by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world considerably better then how they react in the direction of the world. It can't be mentioned constantly that reading addiction only for the geeky individual but for all of you who wants to possibly be success person. So , for every you who want to start examining as your good habit, you can pick Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) become your starter.

**Nathan Hutchison:**

Your reading sixth sense will not betray a person, why because this Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) publication written by well-known writer we are excited for well how to make book which might be understand by anyone who all read the book. Written in good manner for you, leaking every ideas and creating skill only for eliminate your hunger then you still uncertainty Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (EURASIP and Academic Press Series in Signal and Image Processing) as good book but not only by the cover but also from the content. This is one e-book that can break don't evaluate book by its handle, so do you still needing yet another sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.
