Micropolitiques de la biodiversité: Experts et professionnels de la nature (EcoPolis) (French Edition)

Depuis 20 ans la protection de la nature s'est réarticulée autour de l'idée de biodiversité : ce livre décrit cette transformation et analyse sa portée. Loin du militantisme et de la passion pour la faune et la flore, il montre qu'au tournant du XXI^e siècle, la protection de la nature est devenue l'affaire de professionnels, de techniciens et d'experts dans l'exercice quotidien de leur métier. Basé sur une enquête sociologique approfondie, il décrit les tensions et les paradoxes des pratiques et des métiers des professionnels de la nature à l'heure de la gestion de la biodiversité. Car si la protection de la nature s'est affirmée autrefois comme une critique de la société technoscientifique, elle puise désormais résolument dans les répertoires du savoir, de la technologie et de l'expertise : la nature n'a jamais été autant suivie, gérée et étudiée, brouillant les frontières entre sauvage et domestique, naturel et artificiel. Pour autant, ni le cercle des experts ni le corps de techniques et de savoirs de la biodiversité ne sont définitivement fixés et figés. Ils sont au contraire en constante (co)construction. Partant d'une expérimentation de contraception de marmottes pour aboutir aux enjeux des nouvelles sciences de la biodiversité, cet ouvrage invite à un itinéraire buissonnier au cœur des micropolitiques de la biodiversité.
